

Kingsborough Community College  
The City University of New York  
*Department of Nursing*

**Nursing 1900 – Family-Centered Maternity Nursing  
Hybrid Course Syllabus: Spring 2021**

Professor Janette O’Sullivan, CNM, LM, RN, MS Assistant Professor Course Coordinator	Professor Catherine Olubummo, DNP, RN FNP, Professor Professor Loni J. Scott, MS, RN, CNS Assistant Professor
<b>Credit – Hours:</b> 4 credits, 15 hours (one-half semester)	
<b>Pre-requisites</b>	NUR 2000, NUR 2200
<b>Pre or Co-requisite</b>	SOC 3100, ENG 2400

**COURSE DESCRIPTION**

This course present facts, principles and concepts relevant to the care of individuals and families during the reproductive years of the life cycle and introduces the student to family centered maternity nursing. Recognizing the impact of pregnancy on the individual and family, the student develops an awareness of the physiological and psychosocial needs of the patient that may occur during the childbearing years. This is addressed through Quality and Safety for Nurses (QSEN) Initiative incorporating the concepts of patient centered care, teamwork and collaboration, evidence based practice, safety, quality improvement and informatics, the nursing process and the Categories of Client Needs.

This Spring, due to the Covid-19 epidemic, all instruction including lab/simulation will be held online in synchronous (we will be online together) and asynchronous (sessions will be recorded and may be viewed again by students). Classwork for a typical week will consist of: five (5) hours of synchronous online classroom instruction, two hours synchronous laboratory/simulation and eight (8) hours of clinical or clinical substitution online which will be synchronous and asynchronous. Clinical sessions will be held for 3 weeks during the Mini for most sections. When not in clinical, students will have online (virtual) sessions with their instructor and may have sessions in the on campus lab. Those not scheduled for clinical sessions, will have experiences/practice sessions in the On-Campus-Lab and online sessions with their instructors.

**INSTRUCTOR CONTACT INFORMATION**

Contact your instructor using Kingsborough email as follows:

[Catherine.Olubummo@kbcc.cuny.edu](mailto:Catherine.Olubummo@kbcc.cuny.edu)

[Loni.Scott@kbcc.cuny.edu](mailto:Loni.Scott@kbcc.cuny.edu)

[Janette.OSullivan@kbcc.cuny.edu](mailto:Janette.OSullivan@kbcc.cuny.edu)

Use only your CUNY email when emailing your instructors. Your CUNY email is also how you will receive invitations to online lectures, labs and clinicals. **Please make sure your CUNY email is valid and working.**

## **END OF PROGRAM STUDENT LEARNING OUTCOMES (EPSLOs)**

Upon completion of NUR 1900 and the Kingsborough Community College Nursing Program, using the Nursing Process in a variety of health care settings to a diverse population of patients, the student will:

1. Organize nursing care to provide a safe patient environment.
2. Prioritize nursing interventions when providing nursing care.
3. Integrate evidence-based nursing practice into nursing care.
4. Integrate critical thinking/clinical reasoning strategies when providing nursing care.
5. Support principles of teamwork and collaboration when working with members of the interprofessional team.
6. Develop appropriate leadership/management strategies when providing nursing care.
7. Incorporate the utilization of informatics principles and technology systems while providing nursing care.
8. Support ethical and legal principles relevant to the practice of a registered nurse.

## **ASSESSMENT MEASURES for COURSE SLOs**

Students will perform satisfactorily (face-to-face and/or virtually) in the classroom, laboratory/simulation, clinical, virtual and on campus lab settings as evidenced by achieving 75% or greater on written exams and, completion/submission of various course specific written assignments, and demonstration of satisfactory performance on course specific clinical competency and evaluation tools.

## **ASSESSMENT TECHNOLOGY INSTITUTE (ATI) TESTING**

Active participation in ATI assignments and testing is a requirement of this course and will account for 3% of the course grade. Failure to take the proctored exam as scheduled will result in a grade of incomplete and will prevent progression in the program. **Attendance at the ATI NCLEX (Online) Live Review at the end of the semester is mandatory. Failure to attend the ATI (Online) Live Review may delay the submission of your paperwork to Albany qualifying you for the NCLEX RN Licensing Exam.**

## **ATTENDANCE**

Complete participation in class is possible only when students are able to focus attention on the class, therefore entering the virtual classroom after it has begun is disrespectful to Faculty and classmates. Talking out of turn or exhibiting other disruptive behaviors is not tolerated and students will be asked to leave the classroom or lab. Student must have video and audio capability turned on in order to participate in the virtual classroom setting.

All cell phones, smart devices or other multimedia devices that generate sound must be turned off when any member of the academic community enters the virtual classroom.

A student is deemed excessively absent in any course when he or she has been absent 15% of the number of contact hours a class meets during a semester. When a student is excessively absent, a grade of "WU" will be assigned as described in the college catalogue. Attendance at pre and post conference for laboratory experience is required. Absence from either pre or post conference constitutes an absence for the day's experience.

## **STUDENTS WITH DISABILITIES**

Access-Ability Services (AAS) serves as a liaison and resource to the KCC community regarding disability issues, promotes equal access to all KCC programs and activities, and makes every reasonable effort to provide appropriate accommodations and assistance to students with disabilities. Your instructor will make the accommodations you need once you provide documentation from the Access-Ability office (D-205). Please contact AAS for assistance.

## EXAM POLICY

All course exams are administered electronically via Blackboard. Students will be monitored during the exam therefore it is imperative that the student use a computer with audio and video capabilities. The student testing environment should be in an area with adequate Wi-Fi and free from distractions and personal items. [The CUNY Policy on Academic Integrity](#) is strictly enforced throughout the exam. Any suspected violation of this policy may result in removal from the course. Examples of this behavior include, but are not limited to, talking, use of any reading material, and presence of other individuals in the immediate area. There will be no individual exam reviews with faculty members and there will be no group exam review at the end of the exam.

Please be advised that, pursuant to accreditation requirements, the nursing program requires the mandatory use of remote proctoring tools for exams for all students in all nursing courses, regardless of whether a course is given in person or remotely.

## EVALUATION

Grades will be calculated according to college and departmental policy as follows:

A+ 97 – 100	B+ 87 – 89	C+ 78 – 79	D+ 66 – 69
A 93 – 96	B 83 – 86	C 75 – 77	D 60 – 65
A- 90 – 92	B- 80 – 82	C- 70 – 74	F < 60

W	Withdrew without penalty
WU	Unofficial withdrawal (counts as failure)
INC	Doing passing work, but missing an assignment or an examination; changes to a “FIN” if work is not made up by the 10th week of the next 12-week session
FIN	Failure as a result of an Incomplete

**Nursing 1900**– Final grades will be calculated as follows:

Lecture examinations average (2 exams)	62%
Final examination	35%
ATI assignments and testing	3%
Clinical (substitution) competency	Satisfactory or Unsatisfactory
• Writing Assignments	Satisfactory or Unsatisfactory
• Discussion Boards	Satisfactory or Unsatisfactory
• Group Assignments	Satisfactory or Unsatisfactory

Students are expected to take all tests when scheduled. Exceptions to this rule will be for emergency situations and the faculty must know in advance. Students who do not take a test on the scheduled date are required to take a makeup test. All makeup tests may be given at the end of the semester. Students who fail to take the scheduled exams or makeup exams will receive a grade of zero for that test.

All written assignments must comply with college standards for written work. Written assignments are to be turned in on the specified date and time. All assignments must be handed in by the end of the course to complete the requirements of the course. A late assignment will meet the requirements of the course but will not receive full credit. If written assignments are not submitted by the end of the course, the student will receive a grade of "INC" for the course. Students must submit all assignments prior to the beginning of the next semester in order to progress in the program.

Assignments/performance will be evaluated as Satisfactory (S) or Unsatisfactory (U). Performance that has been designated as "U" at the end of the course will result in failure of the course. A minimum average grade of "75%" is required on all clinical assignments to achieve a satisfactory clinical grade.

Students must meet with their instructor if they are failing the course. A conference with the instructor will be scheduled to discuss identify strengths and weaknesses and discuss strategies to attain a successful outcome in the course.

In addition, students may initiate conferences with the instructor at other times. Conference times should be scheduled via instructor/student email as above.

## RETENTION CRITERIA

Criteria for retention in the Nursing Program mandates that students;

1. Earn a minimum of a "C" grade in every required Nursing and co-requisite course inclusive of BIO 1200, BIO 5100, ENG 2400, and PSY 3200.
2. **Students who achieve a "C" grade in required clinical nursing course may apply to repeat the course one time only in the semester immediately following, subject to space availability. The minimum grade for clinical courses that are repeated is a "B."** The "Intent to Return to Nursing Course" form can be found on the KCC Website Nursing Department page under "Forms". This must be completed and include a plan of success that demonstrates significant changes in how they will approach the course when repeated. Only one required nursing course may be repeated. A grade of less than a "C" in a second nursing course will cause the student to be dismissed from the program.
3. Students must achieve a grade of "B" in order to pass NUR 1700. Students in NUR 1700 who achieve a failing grade of no less than "C-" may repeat the course one time only after submitting an "Intent to Return Form."
4. Students who enter Nursing 1700 and Nursing 1800 **MUST** complete the Nursing Program within four years from the date of entry into this course. Any student who has not attended nursing courses for two or more consecutive semesters cannot be readmitted into the Nursing Program unless qualifying examinations have been passed in the required nursing courses previously successfully completed. Qualifying examinations may be repeated only once.
5. Students in the clinical component can only appeal the retention criteria one time.
6. Students in the clinical component can only withdraw once and must be passing to do so.

<b>Teaching Strategies</b>	
<ul style="list-style-type: none"> <li>• Synchronous online lecture/discussion</li> <li>• Aysnchronous taped lectures</li> <li>• Synchronous online lab/simulation</li> <li>• Case studies</li> <li>• Written assignments</li> <li>• Discussion Boards</li> </ul>	<ul style="list-style-type: none"> <li>• Computer Assisted Instruction / ATI</li> <li>• Interactive online videos</li> <li>• Discussion postings</li> <li>• Group Work; Role Play</li> <li>• Clinical substitution assignments</li> </ul>

### **HOW TO PROCEED SUCCESSFULLY THROUGH THIS COURSE**

- All content will be delivered online via Blackboard (BB) for content and some group collaboration via ZOOM throughout the course.
- Students should have a working computer with camera and audio.
- Each week includes live synchronous lecture, lab/simulation and clinical substitution assignments, clinical for most students and On-Campus-Lab for those students not in clinical. These will also be recorded for student convenience. However, attendance at synchronous sessions is required unless there are extenuating circumstances. Please communicate with your instructor if you are having difficulties, technological or otherwise.
- Synchronous sessions: you will receive an email invitation for this “live” synchronous online session via ZOOM where we meet as a group class. The majority of our work together will be synchronous. Some assignments will be asynchronous meaning you will be required to complete an assignment individually or “offline.”
- Weekly assignments, lectures, labs, simulation videos will be posted under course content on BB. An outline of requirements for lecture, lab and clinical substitution can be found on the course week to week schedule which includes due dates and specifics for all assignments.
- Clinical Substitution assignments will be posted separately under Course Content on BB.
- Text book and study guide listed below are required and will be used throughout the course.
- Please let your instructor know if you are experiencing any problems. Communicate with her via your CUNY email only. Let us know if you need help navigating BB. We can work together to find solutions.
- Preparation for all course activities is outlined in the weekly schedule on BB. The course moves quickly and you’re advised to not fall behind in the assignments. Please communicate with your instructor if you are having any difficulties.
- We are here for you and want you to pass the course! Again, email your instructor with any questions or concerns. We will respond within 24 hours.

## REQUIRED RESOURCES AND TEXTS

- Assessment Technology Institute (**ATI**)
- Access to computer with camera and audio (please notify your instructor if you need access to a computer)

## REQUIRED TEXTBOOKS FOR NURSING 1900

Murray, McKinney, Holub, & Jones. (2019) Foundations of Maternal – Newborn and Women’s Health Nursing. Seventh Edition, Maryland Heights, MO: Saunders, Elsevier.

**TOPICAL OUTLINE**

*Each unit incorporates the Categories of Client Needs: Safe and Effective Care Environment (Management of Care, Safety and Infection Control), Health Promotion and Maintenance, Psychosocial Integrity, Physiological Integrity (Basic Care and Comfort, Pharmacological and Parenteral Therapies, Reduction of Risk Potential, Physiological Adaptations*

- Unit 1 Orientation to Family-Centered Maternity Nursing/ Intrapartum Fetal Surveillance
- Unit 2 Assessment and Management of the Antepartum Patient and Family
- Unit 3 Assessment and Management of the Intrapartum Patient and Family
- Unit 4 Assessment and Management of the Postpartum Patient and Family
- Unit 5 Assessment of the Neonate and Family
- Unit 6 Assessment and Management of Women’s Health

*Unit 1 – Orientation to Family – Centered Maternity Nursing / Intrapartum Fetal Surveillance. Maternal Adaptations*

**Content/Lecture Discussion**

<ul style="list-style-type: none"> <li>• Strategies to involve the students in reaching successful outcomes for successful completion of this course</li> </ul>
<ul style="list-style-type: none"> <li>• <u>Strategies for identifying and managing current trends in contemporary maternity nursing</u></li> </ul>
<ul style="list-style-type: none"> <li>• Coordination of care utilizing leadership, delegation, and priority setting in applying critical thinking to the nursing process</li> <li>• Team functioning on safety &amp; quality of care when meeting the needs of the maternity patient and her family</li> <li>• Strategies relevant to the outcomes of care regarding principles of family as they apply to the child bearing family</li> <li>• Provision of Course requirements with sensitivity and respect including:             <ul style="list-style-type: none"> <li>- Maternity and Women’s Health Care Today</li> <li>- Introduction to Labor / The Nurse’s Role in Maternity and Women’s Health Care</li> <li>- Ethical, Social, and Legal Issues</li> <li>- Reproductive Anatomy and Physiology</li> <li>- Hereditary and Environmental Influences on Childbearing</li> <li>- Societal and Cultural Influences on Childbearing</li> <li>- Responsibility and accountability</li> <li>- Research</li> <li>- Quality assurance</li> <li>- Informed consent</li> <li>- Maternal rights</li> <li>- Legal issues during delivery</li> <li>- Home health care</li> <li>- Managed care</li> </ul> </li> <li>• Application of critical thinking processes when practicing safely in the delivery of care to the pregnant patient</li> <li>• The purpose and the steps in critical thinking</li> <li>• The nurse’s role in maternity and women’s health care</li> <li>• Utilization of technology in the care of the antepartum patient</li> </ul>

*Unit 1 – Orientation to Family – Centered Maternity Nursing / Intrapartum Fetal Surveillance.  
Maternal Adaptations (cont'd)*

- Strategies to involve the patient and family in reaching successful outcomes for the antepartum patient
- Coordination of care utilizing leadership, delegation, and priority setting in meeting antepartum related needs
- Team functioning on safety & quality of care when meeting the needs of the antepartum patient
- Strategies relevant to the outcomes of care for the antepartum patient
- Purpose/ Content and Provision of prenatal care including:
  - Conception and prenatal development – Assessing the Fetus
  - Maternal Adaptations to pregnancy
  - Antepartum Assessment, Care & Education
  - Nutrition for childbearing
  - Childbearing Family with Special Needs
- Application of critical thinking processes when practicing safely in the delivery of care to the pregnant patient
- Use of the nursing process throughout the mutually designed plan of care for the antepartum patient
- Utilization of technology in the care of the antepartum patient.
  - Communication and documentation of care rendered via electronic medical record
  - Uses hand held computer devices for health teaching as appropriate

**Related Learner Experiences**

**Required Reading**

- *Murray, McKinney, Holub, & Jones*: Chapters 1, 2, 3, 4, Ch. 5 pp. 70-77, Ch. 6 & Ch. 14.
- Nursing 1900 syllabus

**LAB**

**See Lab Assignment Week #1** Under Course Content

On BB

Synchronous Film and Group Discussion: “The Business of Being Born” via ZOOM

**Clinical Experiences**

See Clinical Substitution Assignment Week #1 under Course Content on BB

- Student will
  - Accurately identify how to assess the laboring patient.
  - Define Leopold’s Maneuvers
  - Describe fetal and uterine monitoring techniques and devices.
  - Evaluate uterine and fetal monitoring strips.
  - Discuss patient-centered care based on evidence based practice with sensitivity and respect
  - Identify the role of team leader using the principles of priority setting and delegation
  - Incorporate national safety standards to ensure the safe and effective delivery of patient care
  - Communicate to all members of the healthcare team utilizing SBAR during simulation
  - Discuss importance of documenting patient status, health teaching, and medication reconciliation using the EHR

**Unit 2 – Assessment and Management of the Antepartum Patient/Complications****Content/Lecture Discussion**

- Strategies to involve the patient and family in reaching successful outcomes for the antepartum patient (cont'd)
- Health teaching related to prenatal care
- Strategies for identifying and managing care of the pregnant patient during antepartum period
  - Strategies for identifying complications of pregnancy
  - Strategies for caring for a pregnant patient who has complications
- Coordination of care utilizing leadership, delegation, and priority setting in meeting antepartum related needs of both normal and complicated pregnant patients
- Team functioning on safety & quality of care when meeting the needs of the antepartum patient
- Strategies relevant to the outcomes of care for the antepartum patient
  
- Purpose/ Content and Provision of prenatal care including:
  - Conception and prenatal development – Assessing the Fetus
  - Maternal Adaptations to pregnancy
  - Antepartum Assessment, Care & Education
  - Nutrition for childbearing
  - Childbearing Family with Special Needs
- Assessment and nursing management of complications during pregnancy including:
  - Gestational Diabetes
  - Preeclampsia
  - Abnormalities in placentation
  - Hemorrhagic conditions of early pregnancy
  - Hyperemesis
  - Preterm labor
- Application of critical thinking processes when practicing safely in the delivery of care to the pregnant patient
- Use of the nursing process throughout the mutually designed plan of care for the antepartum patient
- Utilization of technology in the care of the antepartum patient.
  - Communication and documentation of care rendered via electronic medical record

**Related Learner Experiences****Required Reading**

- *Murray, McKinney, Holub, & Jones*, Chapters 7, 8, 9, 10 & 11.

**LAB**

See **Lab assignment Week #2** Under Course Content on BB.

**Clinical Experiences**

See **Clinical Substitution Assignment Week #2** under Course Content on BB.

- Student will
  - Describe the components of a prenatal health assessment, physical exam, labs
  - Evaluate a patient's prenatal care record as available
    - Differentiate normal and abnormal adaptations in pregnancy
  - Provide patient-centered care based on evidence based practice with sensitivity and respect
  - Act as a team leader using the principles of priority setting and delegation
  - Incorporate national safety standards to ensure the safe and effective delivery of patient care
  - Communicate to all members of the healthcare team utilizing SBAR during simulation
  - Discuss importance of documenting patient status, health teaching, and medication reconciliation using the HER

**Unit 3 – Assessment and Management of the Intrapartum Patient and Family / Complications****Content/Lecture Discussion**

- Components of the birthing process
  - Passage
  - Passenger
  - Powers
  - Psyche
- Strategies to involve the patient and family in reaching a successful outcome in labor and birth
- Health teaching regarding labor and birth.
- Strategies for identifying and managing care of intrapartum patient
  - Coordination of care in meeting related needs for the woman and her family during intrapartum
  - Team functioning on safety & quality of care when meeting the needs of the intrapartum patient
- Strategies relevant to the outcomes of care for the intrapartum patient.
- Provision of intrapartum care with sensitivity and respect specific to
  - Complications of Pregnancy
  - Processes of Birth; Support of physiologic birth
  - Pain Management During Childbirth
  - Intrapartum Fetal Surveillance (review)
  - Nursing care During Labor and Birth
  - Intrapartum Complications
- Application of critical thinking processes when practicing safely in the delivery of care to the laboring patient

**Related Learner Experiences****Required Reading**

- *Murray, McKinney, Holub, & Jones*: Chapters 10, 12, 13, 14, 15, & 16.

**LAB #3**

See **Lab assignment Week #3** Under Course Content on BB.

**Clinical Experiences**

See **Clinical Substitution Assignment** Week #3 under Course Content on BB.

- Student will
  - Identify components of a health assessment of a laboring patient
  - Evaluate uterine and fetal monitoring strips
  - Utilize the nursing process to formulate a plan of care for the laboring patient
  - Identify patient-centered evidence based practices for the laboring patient
  - Describe the team leader role using the principles of priority setting and delegation
  - Incorporate national safety standards to ensure the safe and effective delivery of patient care
  - Communicate to all members of the healthcare team utilizing SBAR during simulation
  - Discuss importance of documenting patient status, health teaching, and medication reconciliation using the EHR

**Unit 4 – Assessment and Management of the Postpartum Patient and Family****Content/Lecture Discussion**

- The Postpartum assessment
- Evaluation of method of feeding; breastfeeding assessment and strategies to support breastfeeding including discussion of Baby Friendly Initiative
- Strategies to reach successful outcomes for the postpartum patient, her newborn and her identified family
  - Health teaching regarding care of the postpartum mother and newborn including normal physiologic changes to be expected, deviations from normal and signs and symptoms to report
- Strategies for managing care of the postpartum patient and her family
  - Coordination of care in meeting related needs for the postpartum patient
- Team functioning on safety & quality of care when meeting the needs of the postpartum patient and family
- Provision of postpartum and newborn Care with cultural sensitivity and respect specific to:
  - Postpartum Physiologic Adaptations
  - Postpartum Psychosocial Adaptations
  - Postpartum Maternal Complications
- Application of critical thinking processes when practicing safely in the delivery of care of the postpartum and newborn.
  - Use of the nursing process throughout the mutually designed plan of care for the postpartum patient.
- Utilization of technology in the care of the postpartum patient.
- Use the EHR to communicate, document care, and for medication reconciliation.

**Related Learner Experiences****Required Reading**

- *Murray, McKinney, Holub, & Jones: Chapters 17 & 18*

**Lab #4**

**See Lab assignment Week #3** Under Course Content on BB.

**Clinical Experiences**

See **Clinical Substitution Assignment Week #4** under Course Content on BB.

- Student will:
  - Identify components of a health assessment with a focus on postpartum / post op (Post C/Section) issues
  - Discuss advantages and disadvantages of breastfeeding
  - Offer strategies for breastfeeding support as appropriate
  - Identify components of a head to toe physical exam for the postpartum patient and the newborn
  - Describe a plan of care for the postpartum patient (S/P normal birth and S/P C/S) and the newborn; differentiate normal from abnormal findings
  - Describe patient-centered care utilizing evidence based practice with sensitivity and respect
  - Describe the team leader role using the principles of priority setting and delegation
  - Incorporate national safety standards to ensure the safe and effective delivery of care
  - Communicate to all members of the healthcare team utilizing SBAR during simulation
  - Discuss the importance of documenting patient status, health teaching, and medication reconciliation using the EHR.

**Unit 5 – Assessment and Management of the Neonate and Family****Content/Lecture Discussion**

- The Newborn assessment
- Strategies to involve the patient and family in reaching successful outcomes for the Neonate and Family
  - Health teaching related to care of the newborn
  - Breastfeeding Benefits / Baby Friendly Initiative
- Strategies for identifying and managing care of the neonate utilizing a team approach
  - Coordination of care utilizing leadership, delegation, and priority setting in meeting neonatal needs
- Team functioning on safety and quality of care when meeting the needs of the neonate.
- Strategies relevant to the outcomes of care for the neonate
- Provision of care of families at risk including:
  - Normal Newborn processes of Adaptation
  - Assessment of the Normal Newborn
  - Care of the Normal Newborn
  - Assessment of infant feeding with breastfeeding support strategies
  - High-Risk Newborn: Complications Associated with Gestational Age and Development
  - High- Risk Newborn: Acquired and Congenital Conditions.
- Application of critical thinking processes when practicing safely in the delivery of care to the Neonate
- Use of the nursing process throughout the mutually designed plan of care for the neonate
- Utilization of technology in the care of the adult patient with a Neonate
- Communication and documentation of care rendered via electronic medical record

**Related Learner Experiences****Required Reading**

*Murray, McKinney, Holub, & Jones: Chapters 19, 20, 21, 22, 23, & Ch.24 pp. 668-684*

**Lab #4**

**See Lab assignment Week #5** Under Course Content on BB.

**Clinical Experiences**

**See Clinical Substitution Assignment Week #5** under Course Content on BB.

**Clinical Experiences**

- Student will:
  - Identify the components a health assessment of the newborn
  - Describe a head to toe physical exam of the newborn
  - Implement an individualized plan of care for the newborn
  - Describe patient-centered care based on evidence based practice with sensitivity and respect
  - Identify appropriate parental teaching and counseling regarding newborn care
  - Describe the team leader role using the principles of priority setting and delegation
  - Incorporate national safety standards to ensure the safe and effective delivery of care
  - Communicate to all members of the healthcare team utilizing SBAR during simulation
  - Discuss the importance of documenting patient status, health teaching, and medication reconciliation using the EHR while meeting the needs of the neonate

**Unit 6 – Assessment and Management of Women’s Health Care.****Content/Lecture Discussion**

- Review the methods of contraception
- Review changes in women’s health needs throughout the lifespan including menopause
- Strategies to involve the patient and family in reaching successful outcomes for the woman with health issues
- Strategies for reduction of health risks for women throughout the lifespan including review of sexually transmitted diseases/ infections: prevention and treatment
- Strategies for identifying and managing care of the woman with health issues utilizing a team approach:
  - Coordination of care utilizing leadership, delegation, and priority setting in meeting the needs for women with health issues
- Team functioning on safety and quality of care when meeting the needs of the woman with health issues
- Strategies relevant to the outcomes of care for women with health issues
- Provision of health care with sensitivity and respect specific to women with health issues including:
  - Family Planning
  - Infertility
  - Preventive Care for Women
  - Women’s Health Problems.
- Application of critical thinking processes when practicing safely in the delivery of care to women with health issues
- Use of the nursing process throughout the mutually designed plan of care for women with health issues
- Utilization of technology in the care of women with health issues.
- Communication and documentation of care rendered via electronic medical record

**Related Learner Experiences****Required Reading**

*Murray, McKinney, Holub, & Jones:* Chapters 25, 26 pp 718-722; 725-732, & 27 pp.737-748; 751-762;767-774

**Lab #4**

See **Lab assignment Week #6** Under Course Content on BB.

**Clinical Experiences**

See **Clinical Substitution Assignment Week #6** under Course Content on BB.

- Student will:
  - Identify the components of a health assessment of a woman
  - Describe a head to toe physical exam for a woman
  - Implement an individualized plan of care for a woman seeking birth control including risks and benefits, contraindications, method of use, etc for individual methods of birth control
  - Provide patient-centered care based on evidence based practice with sensitivity and respect and include information on safer sex practices and healthy lifestyles
  - Act as a team leader using the principles of priority setting and delegation during simulation
  - Incorporate national safety standards to ensure the safe and effective delivery of care
  - Communicate to all members of the healthcare team utilizing SBAR during simulation
  - Discuss importance of documenting patient status, health teaching, and medication reconciliation using the EHR while meeting the needs of the patient with women’s health issues
